Electrum Cleanse 16oz Bottle

SKU: ELT-C16

Electrum Cleanse is an extremely potent antimicrobial solution perfect for use before, during, and after the tattoo process. Electrum Cleanse uses electrolyzed water produced through a proprietary, patented electrochemical process that passes an electrical current through the water and creates super-oxygenated water that assists the immune system in fighting off infections. This clear, hypotonic solution is ideal for cleansing, irrigating, and deriding dermal wounds in addition to moistening and lubricating absorbent wound dressings.
