

Skinlock Transparent Tattoo Sealant

SKU: STT-S

SkinLock is more than just a cutting-edge tattoo bandage alternative. Developed collaboratively by a physician and tattooers, SkinLock's hydrogel solution, coupled with SkinLock Sealant Spray (both included), creates a transparent, breathable barrier over a finished tattoo that promotes healing while protecting the tattoo from dirt and bacteria; completely eliminating the need for secondary dressings.

The new 25% larger pump bottle and spray bottle, that is double the size of the previous version, was designed based on artist feedback to provide more control and value in every use. It's time to ditch the plastic wrap and try the SkinLock Solution.
